

2'x6' Suspension Stand Assembly Instructions

Components

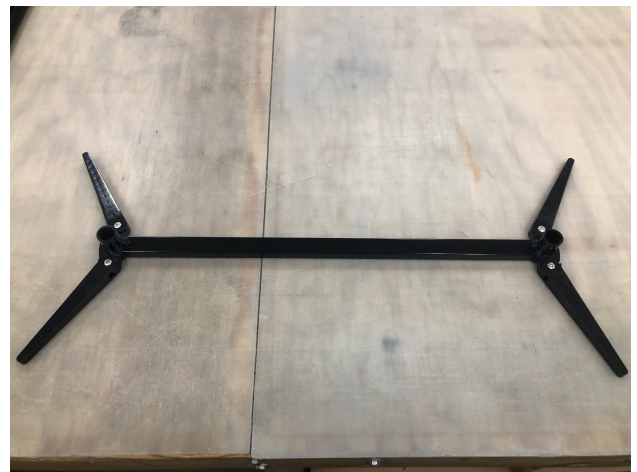

Guides & Channels

Teeth inside tubes must slide into slots in joining pieces.

Base Assembly

Two feet assemblies and one short rectangular bar

Side Pole Assembly

Two long round poles with plastic joining pieces and two long round poles without joining pieces

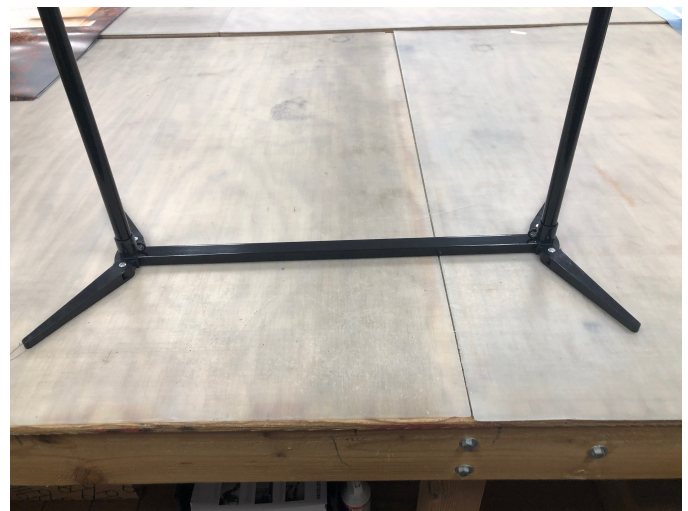

Top assembly

Two corner connectors and one short round pole.

Frame assembly

Frame assembly attached to base

Fully assembled frame

Hand press all components together.

Align teeth inside tubes with slots in the connecting pieces.

It is best to attach clips to frame first and then attach banner.
