

A-FRAME ASSEMBLY INSTRUCTIONS

Your package includes:

- 8 Square aluminum tubes (15' has 12 square tubes)
- 2 End a-frames
- 1 Center a-frame (15' has 2 center a-frames)
- 1 Pack of 20 bungee clips (15' has 22 clips)
- 1 Pack of 4 ground spikes (12' & 15' has 6 spikes)

STEP ONE: Building the A-frame

- A)** Open all a-frame assemblies
- B)** Push an aluminum tube onto the top plastic corner pieces of an end a-frame
- C)** Insert the other end of the aluminum tube into the center "T" plastic piece of the center a-frame
- D)** Repeat on the bottom by inserting another square tube in the bottom of the end a-frame
- E)** Assemble in the same order as the top tube
- F)** Repeat this procedure with the other sections until all aluminum tubes are attached

STEP TWO: Attaching the banner

- A)** Slide a bungee clip through the top corner grommet on the banner
- B)** Wrap the bungee clip around a top horizontal a-frame
- C)** Slide another bungee clip through the same grommet and wrap that bungee clip around the vertical a-frame square tube
- D)** Unroll the banner and follow the same procedure to the opposite top corner
- E)** Follow this process looping one bungee cord per grommet, with the exception of the corners that receive two bungee cords.

NOTE: This display stand is not recommended for use in windy areas or in wet weather. Best used for short term or temporary outdoor use. We recommend storing the frame indoors overnight.
