

Outreach Xbanner Assembly Instructions

Content:

- 4 poles with hooks
- 1 pole with nub
- 1 gray hub

Step1:

- Insert the 4 poles with hooks into the corner sliders with the hooks facing outwards
- The shorter two poles go in the top and the longer two poles go in the bottom
- Insert the pole with the nub into the slider on the back of the gray hub

Step 2:

- Once you have all 5 poles into the hub, and the stand can stand by itself, attach the top 2 grommets of the banner onto the hooks on the top arms

Step 3:

- Being careful not to pull the banner over, with a firm and smooth motion, attach the bottom of the banners on the right bottom leg and then the left leg.

***the poles are meant to bend to keep the banner tight.**
